Autumn Semester 2020
Lugano Facades

Introduction

In a previous semester we studied the palazzo as a building type and its ability to support contemporary urban development, this semester we are interested in working with a similar building type, the palazzina. In simple terms the difference between the two is that a palazzo is a large house, while a palazzina is a multiple occupancy dwelling that is volumetrically similar to a palazzo.

The drawings you can see on the accompanying pages are survey drawings the students produced of a number of buildings we selected as helpful points of reference. In looking at these buildings carefully, measuring them and recording them photographically, and then drawing them very accurately in their current condition, our hope was that they would act as a helpful point of reference for the project work that was subsequently undertaken by the students. The drawings were considered as a collective resource that could be drawn upon throughout the course of the semester.

1
Salita Viarno 33
Jacopo Anzolin

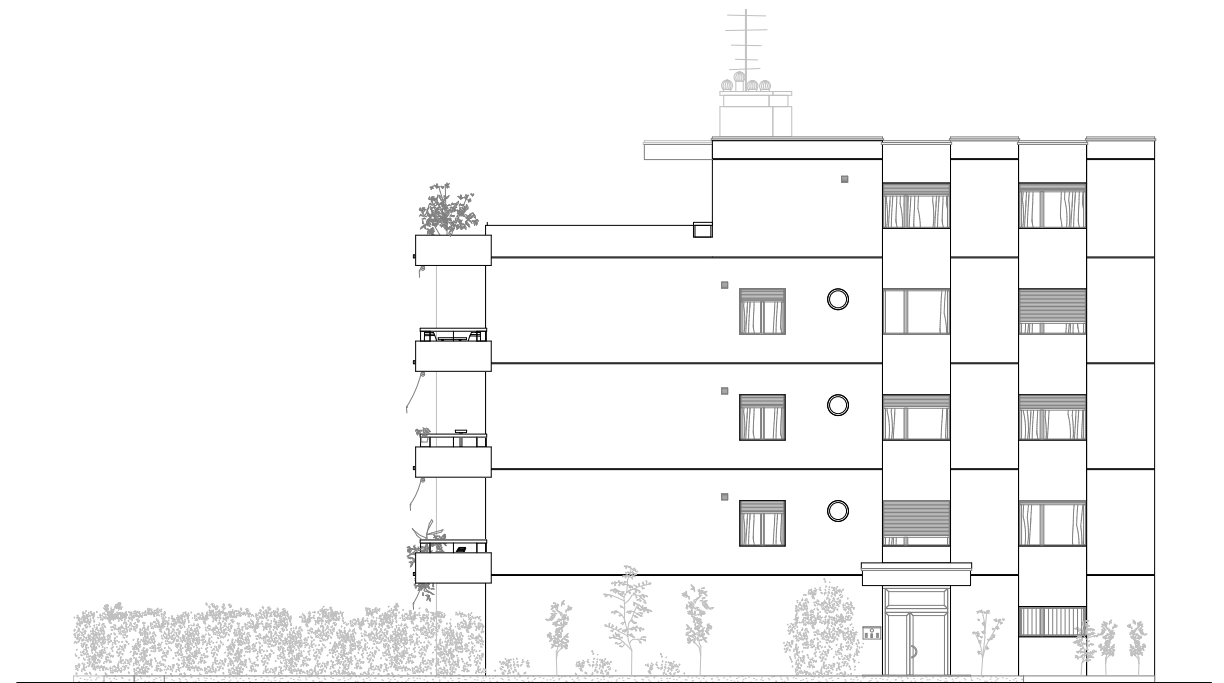

2
Viale Carlo Cattaneo 17a
Chiara Arcidiacono

3
Via Campo Marzio 13
Cecilia Bandera

4
Via Crocetta 7
Fabiano Terenzio Edoardo Baylaender

5
Via Pedemonte 24
Arnaud Youri Beetschen

6
Via Tesserete 3, Massagno, Peppo Brivio 1958
