

Studio Sergison
Spring Semester 2020

A Plan for Zurich
Semester 6
Milchbuck, Oerlikon and Schwamendingen

Over the course of this semester we will complete our work in Zurich, the largest city in Switzerland. This is the last part of a six-semester research project that aims to produce an urban plan for Zurich as the cumulative result of six separate area studies. In this instance we will focus on the Milchbuck, Oerlikon and Schwamendingen neighbourhoods of Zurich.

Several years ago the Department of Urbanism and Architecture for the municipality of Zurich announced that the future development of the city would prioritise densification within the existing urban area and limit the expansion of building on agricultural land. This was approved in a public vote. The result of this strategy will ensure that a denser, more compact urban growth is promoted. For a city that is so well served by public transport, has a refined public realm and generally well planned urban growth in the past, this ambition seems a logical response to the need for the city to absorb a growing population and deal with the pressures this exerts on housing and other public services.

We will be operating in within this context. Concrete proposals should be developed for sites that will in future be considered for densification and development. Projects should offer tangible possibilities for various sites and will take the form of realistic proposals based on current buildings regulations.

A commission of experts has been assembled to support you in developing proposals, and your work will contribute to a wider discussion on the future of Zurich. The work will be undertaken in pairs.

The studio will visit Zurich on 27th February and a study trip to London is planned between 2nd - 3rd April. We would encourage you to follow the casting course offered by the school at the start of the semester.

We will meet in Mendrisio on Friday 21th February at 10:00 for the studio introduction.

Professor
Jonathan Sergison
jonathan.sergison@usi.ch

Assistants
Maria Seline Aejmelaeus-Lindström
mseline.aejmelaeus@usi.ch

Jeanne Wellinger
jeanne.wellinger@usi.ch

Meeting
On Friday the 21th of February
at 10:00 in AAM, for the studio
introduction.
